

OPEN DATA

Bicycle theft

Data set description

General information on statistics

Data origin

The data basis consists of static data from the Data Warehouse Management Information (DWH-FI).

A separate data record is generated for each recorded crime. This includes all bicycle thefts and burglaries of cellars and attics where at least one bicycle is listed as stolen property.

In order to enable a sufficiently accurate temporal allocation, offenses where the difference between the start and end of the offense is more than three days (72 hours) are not provided.

periodicity

Data collection is carried out daily.

It includes all cases that were registered by the police between January 1st of the previous year and the day before the data query.

Regional allocation

The statistics depict crime scenes.

The regional representation of crime statistics is based on the classification of life-world-oriented spaces (LOR). The smallest spatial unit is the planning area (PLR).

Data directory

population	Police reports of bicycle thefts and cellar/attic burglaries involving bicycles as stolen goods
File name	POLjijimtt_Fahrrad.csv
File format	CSV with variable names in the first line
Number of cases	>10,000
Data source	Berlin Police President
Data owner	Berlin Police President

Lfn	variable	Content and encryption	Data type
1	CREATED_ON	Date of transaction creation (day, month, year, time) – DD.MM.YYYY hh:mm)	Date
2	ACTUAL_IN- START DATE	Time of the offense, start of the period of the offense (DD.MM.YYYY)	Date
3	ACTUAL_TIME- CATCHING HOUR	Time of the offense, beginning of the period of the offense (hh)	text
4	TIME OF ACTION_END_THERE- GOAL	Time of the offense, end of the period of time of the offense (DD.MM.YYYY)	Date
5	OF THE TIME_END_HOUR	Time of the offense, end of the period of time of the offense (hh)	text
6	THEM	Planning area identifier, 8 digits Spatial hierarchy: life-world-oriented spaces (LOR) of the Senate Department for Urban Development and Residence	text
7.	AMOUNT OF DAMAGE	Value of the goods obtained (in euros), not material damage! Total amount due if more than one bicycle is stolen. In the case of basement burglaries, the total amount of Damage includes not only the value of the stolen bicycles, but also the value of other stolen items.	Number
8TH	ATTEMPT	Attempt (yes/no)	text
9	TYPE OF BICYCLE	Bicycle type (men's bike, women's bike, etc.) When several bicycles of different types are stolen The value "various bicycles" is displayed for each type.	text
10	TOLICT	Offense group "Bicycle theft" or "basement and attic burglary"	text
11	CAPTURE- GROUND	Offense designation Possible values: "Simple theft of bicycles" "Simple theft of bicycles from cellar/attic" "Other serious theft of bicycles"	text

Lfn	variable	Content and encryption	Data type
		"Other serious theft of bicycles from/in the cellar/attic" Simple thefts are offenses according to §242 of the German Criminal Code (StGB), where the stolen goods (here a bicycle) were unsecured - in the case of serious theft according to §243, a protective device against theft existed or there was commercial activity.
